

High Nature Value farmland in Europe

- Diversity, Experiences and Perspectives for Future -

International Congress 14. – 18. June 2010

in Vilm, Germany

- Diversity, Experiences and Perspectives for Future -

International Conference 14. – 18. June 2010

in Vilm, Germany

Organisation:

- International Academy for Nature Conservation (INA), Isle of Vilm (Germany)
- Institute for Agroecology and Biodiversity (IFAB), Mannheim, Germany
- European Forum for Nature Conservation and Pastoralism (EFNCP)

Date and Venue:

- 14.06.2010 – 18.06.2010 (day of arrival 14.06.2010, departure: 18.06.2010)
- International Academy for Nature Conservation (INA), Isle of Vilm (Germany)

Objectives:

High Nature Value (HNV) Farmland is the most fundamental and endangered nature infrastructure of the European agricultural landscape. In spite of the fact that “HNV farmland” is a relatively new item it has evolved rather rapid as a defined term. But up to now there is only little understanding for the types and the occurrences of HNV farmland across Europe.

With this European conference the HNV farmland types as well as aspects of survey, monitoring and management across Europe shall be presented. Authors of studies, persons involved in evaluation, monitoring and preservation as well as representatives of governments of all European countries are invited. The conference shall encourage the European exchange and the network in this field.

Participation fee, terms & conditions:

There is no conference fee charged. Participants may register using simple registration form available in March 2010

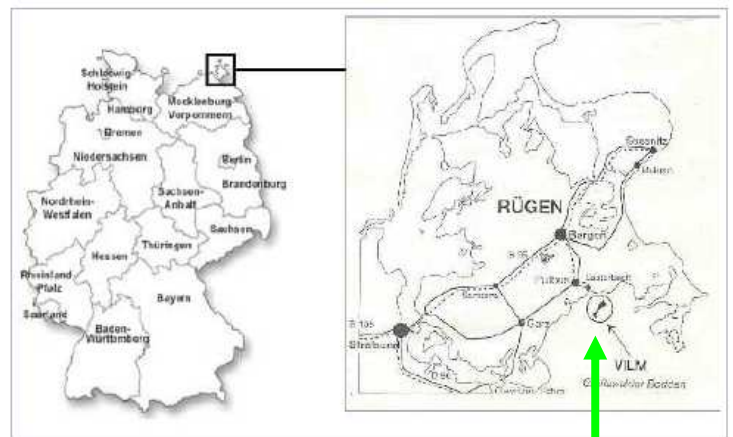

Participants will be responsible for arranging and paying for their own travel and accommodation. Accommodation and excellent meals at reasonable prices are available on Vilm (accommodation single room 51 €, meals whole day 28 €).

Travel:

The conference location is situated on the isle of Vilm in the Baltic Sea (International Academy for Nature Conservation). Access is possible by train and a short boat travel of about 10 Minutes.
